Subject: Re: EPA supplied water in PA?

Hi Jeff,

This is all related to the Dimock case. CERCLA did get involved because in their review of earlier sampling data it was determined that some constituents may be hazardous. So CERCLA authorities are being used to provide four homes with water. It is being delivered by tank truck and this will apparently continue until sampling results come back.. An OSC has been assigned to the case and the OSC is overseeing the sampling of 60 homes in a 9 square mile area around Dimock. Karen Johnson has been very involved with this, so if you need additional information you can contact her.

Subject: EPA supplied water in PA?

Steve and Dave,

I heard that USEPA was providing water to some landowners in PA. Was this SuperFund doing this? Is it bottled water or will they add water to storage tanks that could replace well water piped into the houses?
